Constructing with SomerStone Natural QuarriedStone

Construction using SomerStone QuarriedStone is based on the same principals as constructing with standard bricks. Offering the versatility of stone veneer (single external skin of stone) or double brick (internal and external skins of stone). Standard SomerStone QuarriedStone blocks are 500mm long, 110mm thick and are available in sizes equivalent to two, three and four courses of laid standard bricks.

SomerStone QuarriedStone is available in a range of sizes & textures

SomerStone QuarriedStone Cladding

Cladding can be an effective solution to existing or structural walls including brick and concrete block walls (retaining) where a thin veneer of stone can be adhered to the wall. From an aesthetic viewpoint, the stone will appear as solid stone construction.

SomerStone Cladding - Random

SomerStone Cladding - Bush Hammered

Code	Description	Dimensions			m2 Pallet	Diamond Cut	Bush Hammered
		H	L	D

SomerStone QuarriedStone - Housing Corner Returns

Corner Returns allow construction using 100 mm wide building blocks to look like solid stone throughout the external veneer of the building. On external corners, 100mm stone will leave 100mm stone exposed on all returns, thus the veneer thickness is exposed. Incorporating corner returns, allows for clean even features on the corners of the building and allows the continuation of the "bond" or pattern. This maintains a 'solid' stone appearance on the veneer.

Product Item Code	Description	Dimensions (mm)	Units per Pallet
SOMCRD245	3 Brick Course Diamond Cut	500L x 230W 245H	36
SOMCRD332	4 Brick Course Diamond Cut	500L x 230W 332H	36
