SommerStone 'Natural Sandstone' Product Range

Aberdeen

SommerStone 'Aberdeen' sandstone is a fine to medium grained sandstone with a lithic quartz arenite matrix. SommerStone 'Aberdeen' sandstone is extremely uniform in colour that has become increasingly sought after for interior & exterior applications due to its modern, contemporary feel. This type of sandstone holds consistent workable properties that allows the stone to take a range of surface finishes including honed, polished, bush-hammered and split faced.

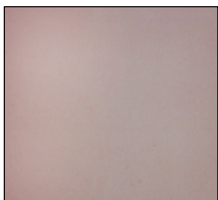

Heritage Brown

SommerStone 'Heritage Brown' sandstone is a medium grained sandstone with medium to high density that is capable of holding a quality honed finish. It is suitable for interior and exterior applications and has a traditional, classic feel. The light and dark tones vary in pieces and illustrate the originality and true natural beauty of this Australian stone. 'Heritage Brown' sandstone is a classic choice to match Australia's beautiful landscape.

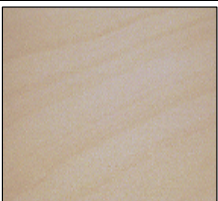

Rainbow Beach

SommerStone's 'Rainbow Beach' sandstone is a medium grained sandstone with excellent workable properties. This medium to high density stone is quarried in a transitional layer in the quarry that shares both characteristics and qualities of both Aberdeen & Heritage Brown sandstones. Its unique nature of loud and distinct colour change portrays its flamboyant nature and beauty. It is well suited for external landscapes and is a unique point of difference.

Blush

SommerStone's 'Blush' sandstone is a medium grained sandstone with a mixture of rose and cream colours. This medium to high density stone is quarried locally in Queensland and works well with a range of colours and textures. It is perfect for all areas including feature walls, capping & paving. This unique offering is in high demand on both residential and commercial projects that require a soft 'heritage' feel.

Desert Dune

SommerStone's 'Desert Dune' sandstone is a medium grained sandstone with a mixture of creams and white colours. This medium to high density stone is quarried locally in Queensland and is our second most popular sandstone. The wave of colours works well in large areas, and will match in with many colour tones including whites, creams and earthy colours of its surroundings.

Resto

SommerStone's 'Resto' sandstone is used extensively for restoration work all across Australia. Currently being used on Queensland Parliament House in Brisbane's CBD and exported to several countries, Resto is consistent in colour and graded to the clients degree of specification. Earthy and solid brown in colour, this sandstone works well in 'busy' areas to help create a centralised, uniform feel.

SommerStone RockFace Cladding

Random RockFace Cladding & Capping

Brick Pattern' Rockface Cladding & Bullnose Capping

SommerStone RockFace Cladding is available in a range of colours and the design is often complimented with matching capping and paving. Contrasting RockFace with smooth, Square Edge Capping is an effective design medium mixing the 'old' and the 'new'.
