

SomersStone Natural Limestone Render

A point of difference: Design Appeal

SomersStone Limestone Render is a unique offering predominantly used in building & landscaping applications. Providing a unique, textured finish in various patterns – the render can be applied as a smooth “render” type finish through to a more highly textured ‘Tuscan’ or ‘quarry’ stone texture.

SomersStone Limestone Render is often used in combination with other materials including our Natural Limestone Cladding, Blocks, timber and painted finishes.

Applications

SomersStone Limestone Render is an effective and highly flexible medium that can be used for most applications. Pre-mixed in 40kg bags, for ease of preparation (simply add water), it is as simple to apply as standard render mix. Smooth, Textured or Bagged finishes can be easily achieved with great consistency of colour.

Cost Effective

As a cost effective medium in comparison to the use of a grey render mix and having to paint for a desired colour finish, SomersStone Limestone Render also removes the requirement for ongoing maintenance with repainting.

Long Term Appeal

SomersStone Limestone Render is not subject to the same levels of fading, efflorescence and bleaching from the sun – always an issue that coloured oxide renders are prone to.

SomersStone Natural Limestone Render

Continuity

Consistency of colour with each pre-mixed bag ensures that when applying different batches to the same area of wall, large variations will not occur, improving consistency of application.

Product Availability

SomersStone Limestone Render is a stock item; however, large quantities are made to order and available within 4-6 weeks from the time of order.

Product Name: SomersStone Limestone Render

Product Code: LRender001

Packaged: 40 kg Bags

Coverage: 40 kg = 2 m² of coverage

Qty Per Pallet: 30 Bags

Total Weight: 1200 kg

Minimum Order: 1 Bag
